Re: USD 102 Cimarron – Ensign
USD 363 Holcomb
USD 466 Scott City
USD 507 Satanta

Following are letters from each of these four school districts appealing a USAC Administrator's Decision on Appeal (Funding Year 1998-99). Each of these appeals was "denied in full" in April. We understand that the next appropriate action is to appeal to your office. Although each school district has submitted an individual appeal, the situations are identical, and I would like to address this issue as Director of the High Southwest Plains Interactive Television Network.

In 1989 nine school districts in Southwest Kansas formed a consortium to provide interactive television to their K-12 students. Although Pioneer Telephone Association, Inc. has always been the common carrier service provider, the schools contract with Southwest Plains Regional Service Center to pay for both telecommunication and administrative services. When Erate funding was made available to our schools in 1998-99, the Regional Service Center was assigned a SPIN (Service Provider Identification Number), and our school districts incorrectly used this number in their Erate applications. Most of our schools were denied funding because SW Plains is not an FCC approved telecommunication provider. The four districts listed above were funded and applied the funding to eligible telecommunication services related to interactive distance learning. I wish to emphasize that although these four districts did indeed use an ineligible SPIN, the money was applied to eligible services in the appropriate time frame. The early years of Erate funding were confusing and once we clearly understood that we were to use the SPIN of our actual telecommunication service provider; our network has been successfully funded.

This application error represents no fraudulent intent; rather it reflects our confusion in accepting a SPIN for the Regional Service Center. I sincerely hope you will appreciate our misunderstanding and will support our appeal to the recent repayment request of the USAC. I would be happy to answer further questions regarding this matter.

Sincerely,

Carol J. Swinney

Carol Swinney, Director of Distance Learning
Southwest Regional Service Center
P.O. 1010
Sublette, KS 67877

Dear Carol;

This is to acknowledge that Pioneer Telephone Association Inc. serves Southwest Plains Regional Service Center as a service provider for the Schools and Library E-Rate Program. Our Spin # is 143002303. We have served in that capacity since the E-Rate Program was initiated. In Year 1 -1998 and Year 2-1999 Pioneer invoiced Southwest Plains \$58,500 for telecommunications service each year. This amount should have been requested for funding from the Schools and Library Program as an eligible telecommunication service. If the proper filing was completed the amount should be been issued to Pioneer for reimbursement to Southwest Plains.

Pioneer currently continues to invoice Southwest Plains for this service and the service has been recently funded through the E-Rate program. Please let us know if we need to provide you with any additional documentation needed for clarification of this service.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lester Younger', is written over the printed name.

Lester Younger,

FCC - MAILROOM

CC Docket Nos. 96-45 & 97-21

RE: Billed Entity Number 138157
471 Application Number 109071
Funding Request Number 133829
Commitment Adjustment Letter Date: October 28, 2002
Applicant's Responses November 1, 2002 & January 3, 2003

USD 102 Cimarron-Ensign received an Administrator's Decision on Appeal (Funding Year 1998-1999) from the USAC on April 21, 2003. The Decision on the Appeal was "denied in full". The primary reason for denial was that our request for telecommunications services came from an invalid telecommunications provider not recognized by the SLD as providing services on a common carrier basis.

In explanation of this application error, USD 102 Cimarron-Ensign became part of an Interactive Distance Learning consortium in 1989. Although telecommunications services were provided by an eligible service provider (Pioneer Tel. Assn., Inc. of Ulysses, KS), the regional education service center (SW Plains Regional Service Center, Sublette, KS) directed the activities and services of the consortium. With the advent of Erate funding, the Service Center was assigned a SPIN (143005424) and members of the consortium mistakenly used this SPIN in the first application. This was not a case of fraud or abuse; rather it was a matter of misunderstanding in the early years of the Erate program. The confusion came from applying the standards of a new program to contractual agreements that had been in place for 9 years prior to the beginning of the Erate program.

School districts in Kansas can have no carry-over of money from one fiscal year to the next; hence the discount awarded in Funding Year 1998-99 was applied to eligible telecommunications services in that fiscal year. I should also note that once our school districts fully understood the application process and applied the appropriate SPIN: 143002303 of our service provider (Pioneer Tel. Assn., Inc.), we have been fully funded for eligible services. This seems to underscore the fact that our request was legitimate although we used an incorrect SPIN in the first year of the program.

We regret the confusion that this use of the incorrect SPIN has created, but assure you that the money provided was applied to eligible services for the students of SW Kansas. We respectfully request that you allow our schools to retain the funding that was awarded in Funding Year 1998-99 for eligible telecommunications services.

To Whom it May Concern:

I am writing to express my strong support for the appeal by Cimarron-Ensign District 102. Situated in Western Kansas with a K-12 population of only 678 students, Cimarron does not allow its students to partake in the technological advantages often enjoyed by its urban counterparts. The E-rate program alleviates this disadvantage and provides immeasurable benefits to the students in this small community.

Cimarron is currently being asked to repay its initial funding because of a mistake in its original application. Cimarron cannot afford this penalty. I understand that technically their application was incorrect, I hope the FCC examines this case from a practical point of view and urge you to cease the remittance requests.

Cimarron is being asked to repay over \$13,000 because of its misinterpretation of the rules during the early years of the E-rate program. On its initial application, Cimarron designated Southwest Plains Regional Service Center (Service Center) as its provider when it should have given that designation to Pioneer Telephone Service, an ETC. The complicated relationship between the Service Center and Pioneer Telephone Service led to the misunderstanding and has since been rectified. Cimarron continues to receive funding for the same project and should not be penalized for a misunderstanding that occurred during the project's infancy.

Cimarron should not be categorized with the schools that have abused the E-rate system. It is a distinguished facility with a hard working faculty that strives to provide its students with an excellent education. To achieve this end, the school has taken full advantage of federal funding to provide an interactive television network for its students. The funding has benefitted many students and faculty. Please reconsider your remittance request and know that I fully support Cimarron in their request. If you have any questions please don't hesitate to contact me or Caroline Walling on my staff at (202) 224-3216.

With every best wish,

Sincerely,

Pat Roberts
